js dom

js obj vs php asscoArr

obj to html

innerText vs innerHTML

js foreach vs php foreach

```js
console.log('myArr typeof', typeof (myArr));
console.log('myObj typeof', typeof (myObj));
console.log('Array.isArray(myArr);', Array.isArray(myArr));
console.log('Array.isArray(myObj);', Array.isArray(myObj));
```

```
myArr typeof object
myObj typeof object
Array.isArray(myArr); true
Array.isArray(myObj); false
```

Array methods
都可以使用foreach完成
oldArr => newArr
array push 增加

map , [1,2,3] => [2,4,6] return value

filter , [20 ,15 , 30] => [20,30] return condition

reduce , return total + value , total 500 , 累加全部的value
